10. Databases Practice

The goal of this session is to practice writing SQL queries.

10.1 Getting Started with SQL

Visit [http://www.w3schools.com/sql/trysql.asp?filename=trysql_select_all](http://www.w3schools.com/sql/trysql.asp?filename=trysql_select_all)

Write the following queries:

- Return all fields from customers located in Germany.
- Return the customer name from customers located in Germany.
- Return a list of all countries from the customer table.
- Return a list of all distinct countries from the customer table.
- Return all contact names for those suppliers located in cities that start with the letter “B”.
- Return all fields for customer 4 from the customers table
- Return the all fields from the orders table for customer 4
- Return all fields for customer “Around the Horn” from the customers table
- Return all the fields from the orders table for customer “Around the Horn”
